

## End Milling Machine for Aluminum Profile LXDB-250A

### Specification:

1. Used for milling the aluminum mullion profile
2. Large capacity milling, multi-pieces profile milling in one cycle.
3. Universal milling blades can be adjusted in up/down, left/right directions and not made extra, which to fit for different processing requirement and ensure the efficient working.
4. Can work for the reinforced mullion in one cutting/milling cycle.
5. Large tools with high and stable milling speed for guarantee the working quality.
6. Hydraulic clamping feeding system, features smooth milling.

### Technical parameter:

Power supply	Made to order
Motor power	3*2.2KW
Motor rotary speed	2800r/min
Operation air pressure	0.5~0.8Mpa
Air consumption	80L/min
Main shaft diameter	φ32mm
Milling blade diameter	φ250mm

Milling deepness	Max.100mm
Milling height	Max. 90mm
Milling profile roughness	Ra12.5μm
Worktable dimension	530*320mm
Dimension	2400*970*1450mm
Weight	650kg
